

Hurricane Dorian: FEMA and Additional Storm-Related Resources

Updated September 5, 2019

Introduction

This Insight provides a brief overview of emergency and major declarations and federal assistance programs potentially available to those affected by Hurricane Dorian. It also lists resources for forecast information, hurricane and flooding information, and selected CRS reports on federal emergency management policy.

The National Oceanic and Atmospheric Administration (NOAA) has issued watches and warnings for Hurricane Dorian, a storm east of South Carolina on September 5. The storm reached hurricane strength as it passed east of Puerto Rico on August 28. The forecast on September 5 anticipates Dorian continuing to move along the eastern U.S. coast, with the potential to move near the coast of South Carolina and near or over the coast of North Carolina on September 5 and 6. NOAA expects southeastern coastal areas to continue to experience tropical storm and hurricane conditions, including life-threatening storm surge, destructive waves, and possible flash floods and isolated tornadoes.

President Donald J. Trump signed emergency declarations for Puerto Rico (August 27), the U.S. Virgin Islands (August 28), Florida (August 30), Georgia (September 2), and South Carolina (September 2). Other emergency declarations may be forthcoming. As authorized under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (P.L. 93-288, as amended; 42 U.S.C. §§5121 et seq.), the President may issue an emergency declaration in anticipation of an incident to support state and local efforts to save lives, protect property, and lessen or avert the incident from becoming a major disaster. As Hurricane Dorian makes landfall, and the storm warrants further federal assistance, the President may issue a major disaster declaration. This allows for a broad range of federal assistance programs to be made available to state, local, and territorial governments, private nonprofit organizations, and individuals through the Federal Emergency Management Agency (FEMA) and other federal agencies.

FEMA has announced the following preparations and responses for Hurricane Dorian:

• FEMA is maintaining a flexible posture to support response efforts in multiple states. Power restoration has begun in Florida, and power crews are positioned to restore power in other areas affected by Dorian as soon as the storm clears.

IN11160

- This is a team effort that includes state, tribal, and local governments; private-sector partners; and nongovernmental organizations like the Salvation Army and American Red Cross.
- Teams are in place to support local, state, and tribal response needs, as requested.
- The U.S. Army Corps of Engineers has deployed 220 personnel including debris clearance staff and temporary power teams in FL, GA, SC, and NC.
- More than 7,700 National Guard troops are on orders, prepared to respond if needed.
- The Red Cross is coordinating to support evacuation centers with over 1,900 trained volunteers, 110 response vehicles, and 104 tractor-trailer loads full of supplies.
- The Salvation Army is providing meals, water, and snacks to evacuees in Florida, Georgia, and the Carolinas.

Types of FEMA Assistance Provided for Major Disasters

FEMA provides three major categories of assistance for major disasters:

- *Public Assistance* (PA) provides grants to tribal, state, territorial, and local governments, and certain private nonprofit organizations, for emergency protective measures, debris removal operations, and repair or replacement of damaged public infrastructure.
- *Individual Assistance* (IA) provides aid to affected individuals and households, and can take the form of housing assistance, other needs assistance, crisis counseling, case management services, legal services, and disaster unemployment assistance.
- *Hazard Mitigation Assistance* (HMA) funds mitigation and resiliency projects and programs, typically across the entire state or territory.

The forms of assistance authorized by a major disaster declaration may vary by the designated areas, per the declaration (subject to amendment). The President can also amend major disaster declarations to decrease the state cost-share requirements for some PA grants.

National Flood Insurance Program

The National Flood Insurance Program (NFIP) is the primary source of flood insurance coverage for residential properties. Homeowners and tenants with NFIP flood insurance can make flood damage claims using the normal NFIP claims process. There does not have to be an emergency or disaster declaration in order to make an NFIP claim.

As of July 31, 2019, the NFIP had \$6.004 billion available (\$4.897 billion in the National Flood Insurance Fund and \$1.107 billion in the reserve fund), as well as \$9.9 billion of borrowing authority from the Treasury and up to \$2.12 billion of reinsurance for a single flood event with losses over \$4-\$6 billion.
